TECHNICAL EDUCATION

Education is a key to success in life. It benefits the development and growth of an individual. Education widens the mindset of a man towards his aims. It mainly focuses on two types; General and Technical.

'Education is the most powerful weapon which you can use to change the world'

General education deals with the basic information of things used in daily life while technical education deals with the skills and techniques required to progress.

Technical education is becoming an essential part of the current time. It is defined as the practical application of knowledge which helps individuals for further employment opportunities.

The skills and techniques can allow them to go for small start-ups. It will benefit them to earn with small investments. Technical education makes individuals self-employed or self-dependent. It is becoming a new method to earn money.

'Technology is a gift of God after the gift of life, it is perhaps the greatest of God's gifts. It is the mother of civilizations, of arts, and of sciences'

There are various opportunities in technical education. The courses covered in technical education mainly belong to engineering, technology, management, architecture, medical, hotel management, catering, etc.

It provides multiple benefits which involve reducing unemployment issues. It helps in improving industry with technology which will result in the skill improvement of individuals.

"Science is nothing but trained and organized common sense."

Skilled workers with technical education are considered the backbone of the country. They are the assets to the country. They can provide services as an engineer, agriculture, architects, etc. The production of skilled workers builds the future of the country.

People do not focus more on technical work due to which Pakistan lacks in technical education. This is resulting in an increased unemployment rate. Our nation needs to understand the importance of technical education as well. It will help us grow as a nation and reduce poverty and unemployment.

"Technical Education is the passport to the future, for tomorrow belongs to those who are for today"
